

Direct Oil: GE90 GE46 GE36

Factories / Foundries / Manufacturing / Warehouses / Shipbuildings / Quarries / Agriculture

- 100% efficient (based on nett C.V.)
- Flexible and simple to operate
- Suitable for Kerosene or Gas Oil
- No warming up period
- Overheat protection
- Thermostat option
- Electric/Photocell flame failure protection
- Heavy gauge fuel filler
- Low body temperature
- 110 volt option available

Direct Gas: G20 G30 G80

Factories / Foundries / Manufacturing / Warehouses / Agriculture

- 100% efficient (based on nett C.V.)
- No warming up period
- Adjustable Output
- Dual voltage selection
- Flame failure protection
- Low body temperature
- Overheat protection
- Hose, regulator and cable stowage
- Fan only facility

Indirect Oil: JUMBO-115 EC70 EC40 EC32

Construction Sites / Factories / Marquees / Garages / Warehouses / Agriculture & Horticulture / Exhibition Halls / Clothing & Food Manufacture

- Large volumes of clean, dry heated air
- Easily and conveniently located on site
- Flexible and simple to operate
- Can be sited indoors or outdoors
- Weatherproof
- Oil fired burners
- Minimum set up
- Remote control via thermostat, froststat, clock etc
- Ideal for long duct runs
- Various duct size combinations
- **Meets with Health & Safety & Insurance regulations**

Electric: DE25 DE95 C115/230 Q115/230

Construction / Offices / Marquees / Exhibitions / Public Buildings / Schools / Canteen / Leisure Centres / Showrooms / Many other Industrial & Commercial Applications

- High portable, instantaneous heat
- Double skin construction to enable low casing temperature
- Sturdy construction with durable stove enamelled hammer finish cabinet
- Overheat safety system where specified
- Solid sheathed elements for long life and low maintenance
- Clean dry heat
- No warm up period
- Extremely flexible in use
- Compact and robust
- All models have carrying handles and where specified, castor wheels
- **Meets with Health & Safety & Insurance regulations**
